

Infinite usages! EZDOME HOUSE

INFINITE ways to enjoy.

CUTE design.

DIY For standard specifications Easy assembly 90min

FREE to use.

## How to assemble the EZDOME HOUSE

Speedy assembly and installation is possible in about 90 minutes.  
\* When assembling with two adults.

1

Place the floor panels one by one on a flat surface. Use an electric screwdriver to connect the panels with screws.

2

Connect all the floor panels. Put the circular panel in the middle of the floor to complete the floor assembly.

3

Install the lower wall panels. One person supports the wall from outside, while another person connects the wall panels from inside with screws.

4

Connect all the lower wall panels. Fasten the lower panels to the floor panel with screws.

5

While one person supports the upper wall panels another person fastens them to the lower panels with screws.

6

When the walls are assembled, place the sunroof and fix it with screws.

7

Following the instruction manual, install the door in the correct position.

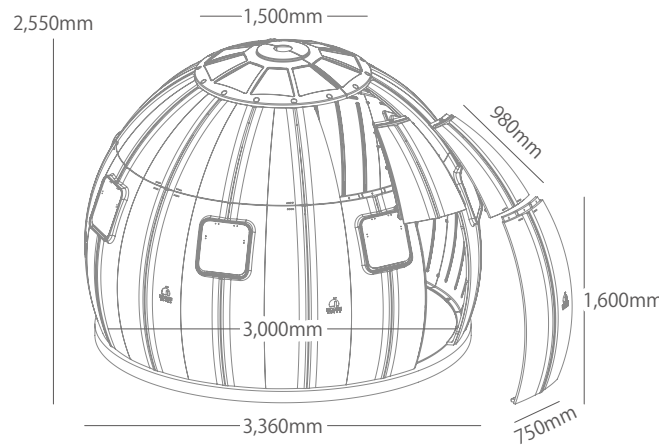

8

With two adults, installation will be completed in about 90 minutes. You can quickly set up an evacuation shelter even in the event of a natural disaster.

## EZDOME HOUSE Standard Specifications

Size	<b>External Dimensions</b> Maximum diameter 3,360mm Height 2,550mm Floor thickness 60mm	<b>Internal Dimensions</b> Maximum diameter 3,280mm (floor diameter 3,000mm) Room height 2,350mm

### EZDOME HOUSE DEALER

Comfortable indoor space.

# EZDOME HOUSE

Easy to assemble ready in minimum 90 minutes\*

\* When assembling with two adults.

EASY to assemble.  
COUNTLESS ways to use.  
CUTE design.

# EZDOME HOUSE GOOD LIFE

## Multi-purpose dome house for various lifestyles.

Easy to assemble and disassemble, comfortable, versatile, and durable.  
Great for use in campgrounds, glamping facilities and private places.

EZDOME House is not only designed to provide an indoor space, but also designed with user convenience in mind. The panels are made of high-density polyethylene, a non-toxic material from which environmental hormones (bisphenol, phthalate, melamine) are not detected. They have excellent thermal, and electrical insulation, as well as impact resistance. The double-layered wall provides a safe and comfortable indoor space. We also offer a variety of optional products to suit your need as you come up with a usage idea.

Campsite,  
glamping facility,

Temporary  
emergency shelter.

Fever patient  
waiting room,  
temporary  
examination room.

Bungalow,  
beach house,

Lounge for outdoor  
workers in Agriculture,  
forestry and  
construction industries

Office space,

Sales / information  
booth at an event

Astronomical  
observation room,

Hobby room,  
den,

Children's  
play room

### FEATURES OF EZDOME HOUSE

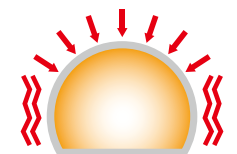

#### ■ Dome buildings are economical and scientific

Optimal energy efficiency  
with smooth air circulation.

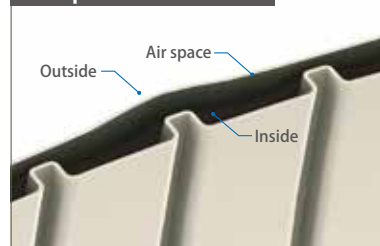

Sturdy construction with a  
shape that is less susceptible to  
impact from strong wind.

Resistant to vibrations  
such as earthquakes,  
external pressure, and impact.

#### Wall panel cross section

**Double-layer wall panels** (40mm thick)  
The hollow double panel enhances the thermal  
insulation to maintain a comfortable indoor  
temperature.

Wall and floor  
material

#### High-density polyethylene

Non-toxic, impact resistant, heat resistant, cold resistant,  
water resistant, acid / alkali resistant, moisture resistant,  
stain resistant and electrically insulating.

Sunroof  
material

#### Polycarbonate

Impact resistant, weather resistant,  
heat resistant, and highly transparent.

#### Cabin style yet attractive price.

Attractive cost performance compared to  
trailer houses and permanent bungalows.

#### Using the eco-friendly materials with excellent durability.

HDPE (High Density Polyethylene) panels,  
which have higher impact resistance than  
polycarbonate, have excellent water resistance  
and are 100% recyclable. Long-term use is  
possible due to UV blocking treatment.

#### Comfortable indoor environment with heat retention and heat insulation

The interior surrounded by HDPE panels  
has better heat retention and heat insula-  
tion than wooden bungalows and poly-  
ester tents, ensuring a comfortable living  
space at all times.

#### Increased space, yet reduced construction costs at the time of setting up.

Since it can also be used as  
a simple accommodation  
facility, you can start your  
business with only a small  
investment.

**EZDOME is unique, modern, and stylish.**

**Made from high-density polyethylene,**

**EZDOME has excellent durability,**

**and is resistant to earthquakes.**

**With its excellent waterproof property and**

**streamlined design, can withstand typhoons.**

**It does not allow snow to pile much in winter, either.**

**Rest assured even under sudden weather changes,**

**EZDOME provides a comfortable indoor**

**space of a reasonable size.**

#### Usage ideas are countless

EZDOME allows you to utilise a  
with your idea space.
